---

Experienced professional proficient in MERN Stack Development, both Front and Back-end Web Development, as well as Shopify Theme & App Development.

## Skills

---

JavaScript, Express, NextJS, Typescript, HTML5, CSS, Jest, NodeJS, Remix, MongoDB, Git, GraphQL, Webpack, Sass, Bootstrap, Cypress, VueJS, Shopify Development, Shopify App Development

## Experience

---

### Contract Software Developer

Debybe & Co • New York, NY

01/2016 - Present

- Develop and implement client-side applications for multiple clients, consistently meeting project requirements and deadlines.
- Utilize REACT, NextJS, Remix, Vue, and other cutting-edge technologies to create responsive and high-performance web solutions.
- Apply industry-standard CSS methodologies, including BEM, SMACSS, and OOCSS, to create maintainable and scalable stylesheets.
- Proficiently work with Sass and various UI libraries such as Tailwind, Material UI, and React-Bootstrap to enhance user interfaces.
- Demonstrate a strong server-side proficiency by utilizing NodeJS, Express, Python and other server-side technologies to build robust backends.
- Consistently adapt to new technologies and stay up-to-date with industry trends to ensure the highest level of expertise.
- Implement Test-Driven Development (TDD) methodologies using Cypress or Jest, enhancing code quality and reliability.
- Dedicate efforts to ensure web applications adhere to Web Accessibility standards, promoting inclusivity and usability.
- Conduct thorough code reviews and quality assurance (QA) processes, contributing to the development of error-free and performant software solutions.

### Application Architect ( React Developer )

Bank of America • New York, NY

12/2022 - 12/2024

- **Feature Development in React**
  - Design and develop application features using the React framework.
  - Focus on creating interactive and user-friendly interfaces that meet the specific requirements of banking applications.
- **Performance Enhancement**
  - Continuously monitor and enhance the performance of user applications.
  - Implement efficient code and optimize existing functionalities for better speed and responsiveness.
- **Bug Fixing and Problem Resolution**
  - Identify, diagnose, and resolve bugs in the application.
  - Implement fixes and updates to ensure the application runs smoothly with minimal downtime.
- **Collaboration and Teamwork**
  - Work closely with the Team Architect and other team members on application enhancements.

- Collaborate in a cross-functional environment to align application architecture and design with the bank's strategic goals.
- **Application Enhancement Strategy**
  - Contribute to the strategic planning of application enhancements.
  - Ensure the application's architecture is scalable, maintainable, and aligned with industry best practices.

## Senior React Developer

TULA Skincare

03/2021 - 06/2024

- Created and integrated a highly responsive UI component.
- Successfully transitioned TULA's website into a headless environment.
- Optimized components for superior performance across various web-enabled devices and browsers.
- Proficiently troubleshooted interface software and resolved application code issues.
- Expertly managed third-party application integrations.

## Vue JS Developer

Elephant • New York, NY

08/2022 - 03/2023

As a Senior Frontend Engineer at Elephant, my contributions were instrumental in enhancing the VueJS-based front end of the project and ensuring its alignment with Elephant's client design model and accessibility standards. Key contributions from my role:

- Developed new VueJS features and pages, enhancing user experience.
- Conducted thorough code reviews to maintain high-quality code standards.
- Ensured strict adherence to client design models and standards.
- Maintain accessibility standards, promoting inclusivity and compliance.

## Senior Shopify Developer

Birdy Grey • Los Angeles, CA

06/2022 - 09/2022

- Spearheaded the development and deployment of highly responsive user interface components, elevating the overall user experience.
- Translated specifications and mock-ups into fully functional solutions, ensuring an accurate representation of design concepts.
- Effectively modified and updated the existing website to incorporate new features, resulting in improved functionality and enhanced UI/UX design.
- Streamlined code maintenance by creating and optimizing reusable sections and snippet templates, promoting code readability, and facilitating Theme editor usage.
- Collaborated with leadership to provide valuable insights and guidance on development capabilities, ultimately boosting web performance.
- Enforced Web Accessibility best practices, enhancing the inclusivity and usability of the web application.

## Senior React Developer

Isobar Public Sector • Chicago, IL

04/2022 - 07/2022

- Develop and implement highly responsive user interface components
- Collaborate with senior developers on major feature implementations
- Documenting complex feature components

## Senior React Developer

PwC • New York, NY

08/2021 - 07/2022

- Develop and implement highly responsive user interface components
- Utilize libraries such as Apollo, GraphQL, Auth0, Kendo-React, & more to enhance client's applications
- Apply TDD method within development processes
- Collaborate with other senior developers on research and complex feature implementations
- Documenting complex feature components

## Senior Frontend Developer

Publicis Sapient • New York, NY

06/2021 - 04/2022

- Engineered and integrated responsive user interface components.
- Leveraged libraries like Apollo, GraphQL, Auth0, Kendo-React, and more to elevate client applications.
- Implemented Test-Driven Development (TDD) methodologies throughout development.
- Collaborated with senior developers on research and intricate feature implementations.
- Meticulously documented complex feature components for reference and clarity.

## Frontend Developer/React Native Developer

GOLO LLC

10/2020 - 07/2021

- Provide leadership and technical support to design, develop and maintain an efficient, unified, and fully integrated technology system
- Update and debug existing e-commerce programs to ensure a smooth user experience and a uniformed look across a variety of platforms
- Create visually appealing custom pages and websites that utilize responsive design/development and mobile web best practices
- Write clean, efficient, error-free, and well-documented code (and update existing code) that meets accessibility standards and requirements for performance
- Test cross-browser and cross-device compatibility
- Provide A/B and split testing to improve website performance
- Review application and feature coding and plan website upgrades as part of a comprehensive web roadmap
- Provide daily implementation of all changes to the website from the GOLO marketing team
- Provide suggestions on improving workflows based on current industry trends and innovations

## Frontend Developer

FUBU LLC

12/2016 - 07/2020

- Design and create UI/UX as well as develop the website using JavaScript, HTML, CSS, JSON and more
- Design and develop a custom Shopify theme: Custom page templates, sections, and reusable snippet
- Implement third-party application integrations

## Frontend Web Developer

The Shark Group

11/2014 - 07/2020

- Develop project concepts and maintain optimal workflow
- Design and program page templates, sections, snippets, and JavaScript/JQuery scripts
- Update and debug existing e-commerce programs to ensure a smooth user experience
- Carry out quality assurance tests to discover errors, optimize usability and readability
- Test cross-browser and cross-device compatibility
- Provide daily implementation of all changes to the website
- Provide suggestions on improving workflows based on current trends and innovations in the industry

## Education

---

### Computer Science

New Jersey City University

01/2018

### Creative Arts & Technology

Bloomfield College
